Applications

The difference between apps and applications

We can make our own applications. Using HTML, CSS, and JavaScript, we can create interactive web pages. In the course of this chapter, we will learn how to use variables, loops, and classes to create dynamic, interactive web pages. The aim of this chapter is to start creating some real-life applications.

Aims of this chapter

1. Write a class called CurrentAccount that includes methods to deposit and withdraw money and to inspect the balance.
